**Engine:  
CoQ10**

# Power the Heart with CoQ10

- The heart is the most energy intensive muscle in the body
- Its cells need a continuous energy supply – this energy is called **ATP**
- **If ATP is the gas, CoQ10 is the pump** that gets the fuel into the cells to give them the energy they need to function
- Every cell in the body requires CoQ10 to run, but the heart, kidneys, liver, and brain require especially high concentrations of CoQ10

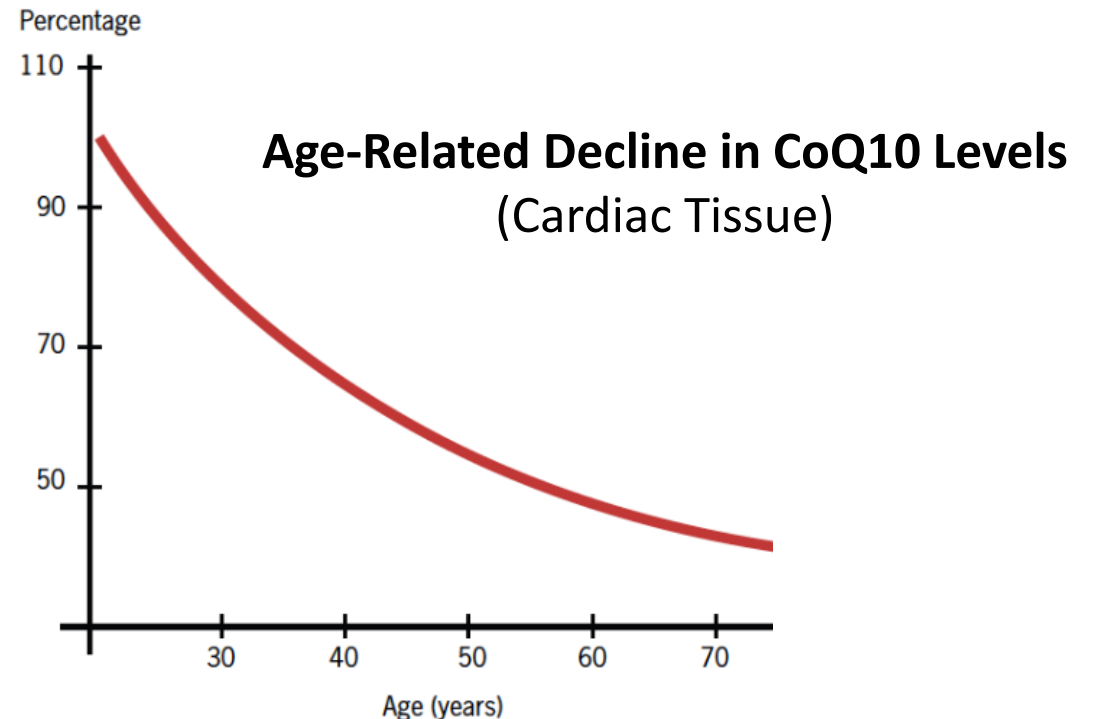

# What is CoQ10?

- Something like a vitamin, but not classified as one because the body can synthesize it
- Two major functions
  - Cellular energy (the pump that supplies cells with ATP)
  - Antioxidant to protect cells from free radical damage

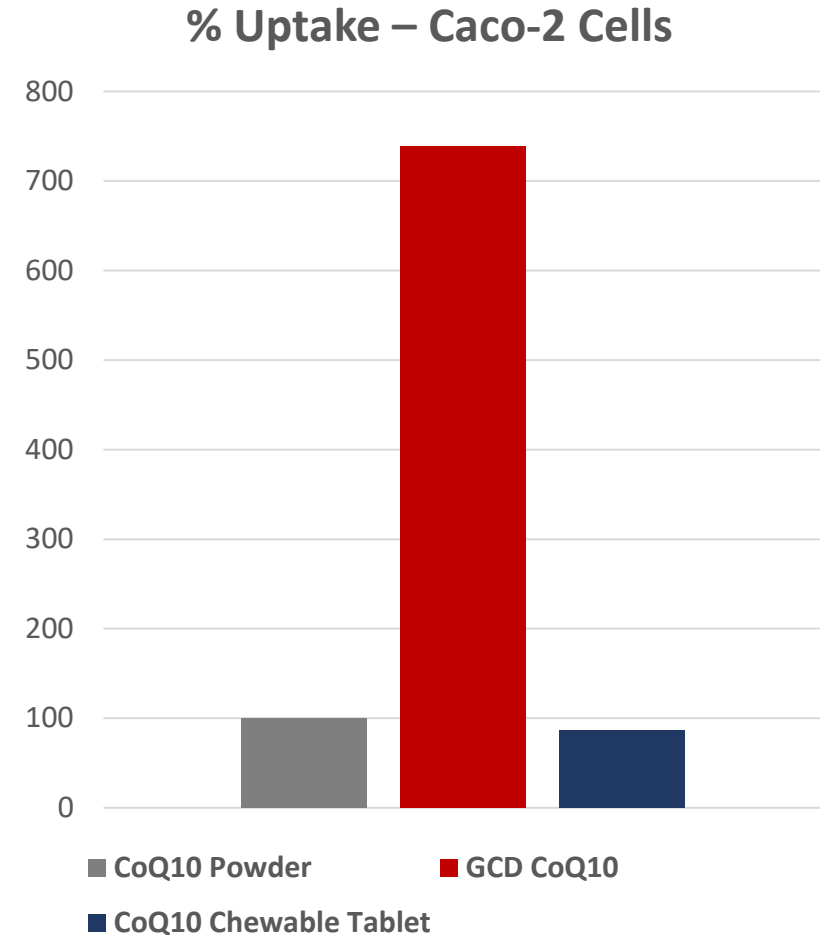

## What reduces CoQ10 levels?

- Statin drug use—51% reduction in CoQ10 after only 30 days of cholesterol lowering drug use!
- Aging

# Gamma Cyclodextrin: Boosting CoQ10 Absorption

- Comparison of absorption using pharmaceutical standard Caco-2 test
- Cellular uptake was **over 7 times higher** versus unformulated CoQ10 powder, and **over 8 times higher** for CoQ10 versus a standard chewable CoQ10 tablet

# CoQ10 Chewable

- **CoQ10 Enhanced Absorption with GammaSorb**
  - Boosts absorption **800%**
  - Chewable - mild orange flavor sweetened with xylitol
- **Heart, brain, nervous system, and cellular energy production\***
  - Replenishes CoQ10 depleted by statin drugs
