Your dog is thinking about his next treat or game of fetch, not his health.

Pets rely on you to be thinking about antioxidants that help remove damaging free radicals. You have the answer—**Curacel Curcumin from Terry Naturally® Animal Health** offers optimal cellular support for dogs.

You can help maintain the health of your dog with the best curcumin available—the only bioavailable curcumin from turmeric with turmeric essential oil and ar-turmerone.

- Supports normal cell function and cellular health
- Up to 500 times stronger than plain turmeric[^]
- Helps reduce the negative effects of oxidative damage and stress
- Helps eliminate free radicals associated with the aging process

You can support the cellular health of your treasured pet with Curacel Curcumin.

Curacel Curcumin is an antioxidant, cellular-supporting powerhouse!

What's Inside:

Curacel Curcumin is unlike plain turmeric or even plain standardized curcumin extracts. Plain turmeric only provides 2-5% of the beneficial curcumin compound. Your dog would have to ingest hundreds of capsules of powdered turmeric to get the right amount of curcumin. And, without absorption, your pet would be getting curcumin in name only. Our curcumin is extracted from turmeric and then blended with ar-turmerone, allowing our formula to provide an enhanced bioavailable curcumin that delivers superior results for your best friend. Our curcumin is sustainably grown by local farmers for fair-trade prices in northeast India without the use of pesticides or chemicals. It's thoroughly tested and analyzed for contaminants and potency in India and here in the United States. Don't settle for just any curcumin when it comes to your pets. Choose Curacel Curcumin.

MONEY-BACK GUARANTEE

[^]Based on enhanced absorption of Curacel curcumin versus equivalent weight capsule of unstandardized turmeric, containing 2% curcumin.
