Jump! Run! Play! A dog's life is all about strong and flexible hips and joints. Whether your dog is a "youngster" or celebrating many birthdays, Joint & Hip Formula can ease stiffness due to normal daily exercise and activity.

This proprietary formula exclusively from Terry Naturally[®] Animal Health is the answer for every dog's joint and flexibility needs. It's perfect for erasing joint stiffness due to normal daily exercise and activity.

Joint & Hip Formula has both a highly absorbable curcumin and a clinically studied and uniquely standardized boswellia. This combination synergistically helps maintain healthy bone and joint function.

Joint & Hip Formula:

- **Helps Maintain Healthy Cartilage and Joint Function**
- **Helps Relieve Occasional Joint Stiffness**
- **Supports Healthy Hip and Joint Health**

Exactly what you want for your dog.

What's Inside:

This powerful combination is the right choice for joint health and flexibility.

Curcumin: Plain standardized curcumin extracts don't provide the right absorbability to make a difference. Our curcumin is extracted from turmeric and then blended with turmerones (from turmeric essential oil), allowing our formula to provide a high absorption curcumin that delivers superior results. It's sustainably grown by local farmers for fair-trade prices in northeast India without the use of pesticides or chemicals, and it's thoroughly tested and analyzed for contaminants and potency in India and here in the United States.

Boswellia: Our boswellia contains up to 10 times more of the most powerful compound in the botanical. It's called AKBA and it's the desired ingredient for dogs. When it comes to your special pet, don't settle for unstandardized boswellia extracts. We use only a uniquely standardized boswellia—the most advanced boswellia available.

MONEY-BACK GUARANTEE

[^]Based on enhanced absorption of Joint & Hip Formula curcumin versus equivalent weight capsule of unstandardized turmeric, containing 2% curcumin.
